Key findings from the Africa Capital Markets Report 2026

The Regional Centre of Excellence of the Financial Services Commission, Mauritius, in collaboration with the Bank of Mauritius and the Organisation for Economic Co-operation and Development, will host a virtual presentation on the **Key findings from the Africa Capital Markets Report 2026** on **Monday, 30 November 2026** at **11:00-12:00 hrs** (Mauritius Time).

Overview

Africa's capital markets navigated global shocks and geopolitical uncertainty well in 2025 and early 2026. Governments and corporates in the region's major economies continued to access financing through capital markets, supported by improving domestic macroeconomic conditions and recent reforms. However, capital markets still played a relatively limited role compared to other emerging market economies.

This webinar provides an overview and key findings of the OECD's Africa Capital Markets Report 2026, reviewing recent developments across the region and highlights priorities for deepening markets and expanding access to long-term and diversified sources of finance.

Participants will be entitled up to 1 CPD units from the ACCA & up to 1 PL credits from the CFASM.
